December 2025

Dear Healthcare Professional

Globally and in South Africa, breakthrough technologies in diabetes management are transforming healthcare delivery and funding models. New care delivery Innovations and digital health platforms are unlocking new possibilities for both clinical and administrative processes. These advancements empower healthcare professionals to deliver more precise, personalised, and proactive care, while enabling patients to become active participants in managing their condition.

Importantly, these technologies support a shift towards predictive and preventive care, reducing complications and improving long-term outcomes. Healthcare funders recognise that such innovations not only expand access to quality care but also optimise resource utilisation, making diabetes care more sustainable and cost-effective.

Glencore Medical Scheme, MEDiPOS and Tsogo Sun have appointed Discovery Health as the new provider for our diabetes management programme effective 1 January 2026. You may register members of the scheme for the Diabetes Care Programme.

Thank you for your ongoing partnership and for the exceptional care you continue to provide to members of the Discovery Health Medical Scheme and the other medical schemes we administer. We look forward to working with you in 2026 to continue to deliver the best possible care in the most efficient manner to Scheme members and, indeed, to collectively continue to strengthen South Africa's healthcare system going forward.

Yours sincerely

Darren Sweidan
