October 2017

Dear Doctor

ACCREDITATION OF THE CDE FOR THE MANAGEMENT OF CARDIOVASCULAR DISEASE

The Council for Medical Schemes (CMS) recently extended its accreditation for the Centre for Diabetes and Endocrinology as a Managed Care Organisation from the management of diabetes alone to **include the management of the following:**

- Cardiac Failure/Cardiomyopathy/Dysrhythmias/Coronary Artery Disease
- Diabetes
- Hyperlipidaemia
- Hypertension
- Chronic Renal Disease

The **CDE is a provider centric DSP** registered with CMS to **take risk as a Managed Care Organisation.**

This is particularly welcomed as it provides an invaluable opportunity to bring together a host of clinicians, to collaboratively address our patients' needs holistically.

Invaluable upskilling of our healthcare professionals with these other disciplines can only contribute to making us stronger and offering our patients the best, fully inclusive, care that we have to offer.

It also offers our funders an ideal opportunity to place the care of their members under "one roof".

We are excited and motivated to move forward for the benefit of all concerned.

Warm regards

Grant Newton
Chief Executive Officer

Directors: Prof Larry A Distiller (Executive Chairman), Liz Kolobe, Zain Laher, Hale Matsipa, Grant Newton, Richard Pender
