

CLEAN LINEN AVAILABILITY CHECKLIST

Clean Linen Availability Checklist

Standard: 2.2.3.1 – Maintaining an environment to minimise infection risk

Criterion: 2.2.3.1.2.1 – Clean linen is available in the practice

Assessment Type: Observation

Risk Rating: Essential Measure

Instructions:

- Observe whether **clean linen** (cloth or disposable) is available in accordance with the practice's operational requirements.
- **Score 1** if clean linen is visibly available and in sufficient supply; **Score 0** if it is not.
- Include any relevant comments on the condition, storage, or adequacy of the linen.

Clean Linen Availability Observation

Observation Item	Score (1/0)	Comment
------------------	-------------	---------

Clean linen is available as per practice requirements _____		
---	--	--

Notes for Auditor:

- Linen should be **clean, dry, and free from visible contamination**.
- Linen storage should be **separate from soiled linen** and ideally stored in a **closed or covered container/cabinet**.
- Disposable linen should be intact and stocked as per patient care demand.
